Indexing, selecting, assigning reference

This is the reference component to the "Indexing, selecting, assigning" section of the Advanced Pandas track.

In [1]:

```
import pandas as pd
reviews = pd.read_csv("../input/wine-reviews/winemag-data-130k-v2.csv", index_col=0)
pd.set_option("display.max_rows", 5)
```

Selecting specific values of a `pandas DataFrame` or `Series` to work on is an implicit step in almost any data operation you'll run. Hence a solid understanding of how to slice and dice a dataset is vital.
